

The man who gets the business needs this electronic friend.

Now the traveling businessman can make, within a matter of minutes, the kind of exact hair-splitting calculation it takes to close a deal almost instantly. Sharp's truly portable Compet 22 marks a revolutionary advance in the world of business.

New integrated circuits in the Compet 22 make it possible to replace multiple transistors and parts without sacrificing its ability to perform a wide range of sophisticated calculations of up to 14 digits and 6 decimal places. A built-in memory register stores intermediate answers for even more sophisticated calculations. Results flash instantly on a streamlined electronic display panel.

Other Sharp IC desk calculators are the big capacity Compet 32, which can calculate 16 digits with 8 decimal places, and the tiny yet Mini-Compet 17 with a 12-digit, 6-decimal capacity. Is it any wonder that the man who gets the business?
