

SOME First the facts. It's an electronic printing calculator with
IMPORTANT FACTS MOS/LSI circuitry. Has a buffered keyboard that
AND A LITTLE remembers what you enter, regard-
RAZZMATAZZ less of how fast you enter it. Per-
forms chain calculations. Has two
accumulators plus a powerful
working register. Lets you flip-
ABOUT flop amounts between registers when multiplying
or dividing. Has two complete decimal systems—
UNICOM 141P full floating or floating in/fixed out.
Works percentages automatically.

Prints three lines a second and shows negative answers in red. Performs automatic duplex functions. Weighs 11 pounds and takes up only a little more desk space than a letterhead. And now the razzmatazz. UniCom 141P is the most powerful printing calculator in the world in its class. Experts told us we'd be crazy if we sold it for anything less than \$1,000. So we set the price at \$695. To find your nearest UniCom representative call (800) 243-6000 toll free. In Connecticut call 1-(800)-882-6500. Or write UniCom Systems, Inc., 10670 North Tantau Avenue, Cupertino, CA 95014.
