

The printing calculator for the home that's setting records all over the country. The portable, affordable TI-5030.

Tax records, accounting records, budget records – the best way to keep a home running smoothly is to put it all on paper. If that paper's rolling out of the Texas Instruments TI-5030 printer/display calculator, that's even better.

The TI-5030 is our portable, affordable, office-quality calculator designed for the home. Anywhere in the home – the

kitchen, den, living room, wherever you do your paperwork – because the TI-5030 weighs less than two pounds and runs on batteries. It also comes with an AC adaptor, so if you want, you can plug it in.

The TI-5030 has large, fatigue-fighting keys. It gives you all the functions you need, and delivers answers the way you

want them: clearly, on a bright fluorescent display, and permanently on its plain-paper printout.

The TI-5030. For the record, it's a great way to polish off your paperwork.
